LEVEL ALIGN SPACE HOLD

Tile Leveling System for Large Format Tiles Up to 3/4" Thick

Used by professional and DIY installers to save time and obtain leveled and consistently spaced tile.

Two-Part System Eliminates Uneven Tile

Designed to level, align, space, secure, and hold large format porcelain, marble, and stone tile up to 3/4" thick during installation.

Part 1: Stems

Stems available in 3 formats to work with any tile layout, aligning neighboring tile of the same thickness for a leveled surface.

Part 2: Caps

Caps can be used with the in-line stems, the 3-corner stems and the 4-corner stems.

Tile Leveling Caps Used on All the Stems

Designed to hold the large format tile at an even height for lippage-free results, providing visibility of a set of joints at a time.

Tile Leveling In-line Stems

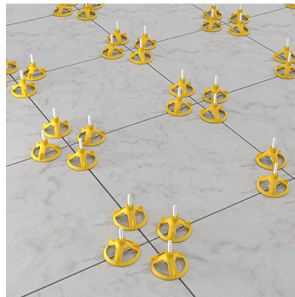

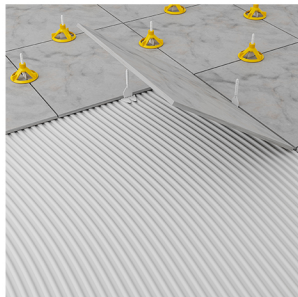

Special design ensures even spacing when installing tile in-line, producing even 1/16" grout lines.

Tile Leveling 3-Corner Stems

Cross design ensures even spacing where three tiles come together in a 1/16" (1.5 mm) joint.

Tile Leveling 4-Corner Stems

Use where four tiles come together, placing at the corners to ensure the tiles are leveled, all of them with 1/16" (1.5 mm) wide grout lines.

For Faster Tile Installation With Professional Results

Easy to use without any tools.

Stems in 3 Formats Ensure Even Spacing of Tile

For installation of large format floor and wall tile.

Leveling Caps Provide Lippage-Free Results

For single use only, stems break off below the surface of the tile.

Easy to Remove Caps and Stems

Reusable round caps can be removed after installation.
